

For Immediate Release

Azima DLI Showcasing TRIO CX-7 and WATCHMAN Reliability Services at EASA 2012 Convention & Exhibition

Latest Vibration Data Collector and Machine Condition Analyzer Features Automated Diagnostics and Ergonomic Design to Fully Enable the Mobile Maintenance Professional

NASHVILLE, Tenn. – EASA 2012 Convention & Exhibition, Booth #1234 – June 22, 2012 -- [Azima DLI](#), the leader and premier provider of [Predictive Maintenance](#) (PdM) analytical services and products, today announced details of its participation at the [EASA 2012 Convention & Exhibition](#) taking place June 24-26, 2012 in Nashville, Tenn. Azima DLI will demonstrate the [TRIO™ CX-7](#), the company's latest vibration data collector and machine condition analyzer, as well as [Azima DLI WATCHMAN™ Reliability Services](#).

The TRIO CX-7 is the first of a new generation of vibration data collectors and machine condition analyzers. The product's new ergonomic design and Bluetooth® wireless data acquisition provide more comfort and efficiency when performing repetitive data collection to support PdM programs. The TRIO CX-7's embedded, award winning automated diagnostics and Windows® 7 operating system provide the most capable unit available on market. Features include:

- **Advanced Computing Power:** The embedded, award-winning automated Azima DLI ExpertALERT™ diagnostics software and Windows® 7 Ultimate operating system combine to provide the most capable data collector on the market.
- **Wireless, Voice-Activated Data Collection:** For improved safety and maneuverability, the CX-7 supports hands-free, Bluetooth®-enabled, wireless data acquisition from up to 30 feet away.
- **Voice Command Data Acquisition:** Gives operators the option of using the data collector without physical interaction with the unit.
- **Greater Portability, Safety and Ease of Use:** A lightweight, ergonomic, modular design enables greater portability, improves safety and decreases the physical demands of data collection.

Azima DLI [WATCHMAN Reliability Services](#) combine the industry's most advanced and reliable analytical software with remote monitoring capabilities to deliver solutions ranging from subscription-based vibration analysis to advanced onsite technical assistance. Aimed at transforming current machine condition monitoring practices, WATCHMAN Reliability Services enable industrial plants, transportation organizations and the military to implement high quality, sustainable condition monitoring programs to avoid unnecessary maintenance and unplanned equipment failures.
