

Azima DLI, Inc. is seeking a **Product Testing Technician** to perform testing and quality assurance of hardware and software products at the Technician level; implementing test projects during the development phase and manufacturing phases of product release. This includes software testing, systems testing, test documentation and production QA testing.

Location: Poulsbo, WA

**Responsibilities:**

- Performs product testing of hardware and software including data collectors & software.
- Performs software testing of Web Portal software & systems.
- Performs integration and testing of the Azima DLI online system products.
- Other responsibilities include providing computer and network systems integration in conjunction with IT department in support of testing products and systems.

**Skill Requirements:**

- Experience with system testing of integrated hardware and software products.
- Experience with QA procedures, test plans, test scenarios, and test reports.
- Proficiency with Microsoft Windows Operating systems & Windows Networking.
- Excellent interpersonal skills and experience working with a diverse development and test team.

**Experience / educational requirements:**

- Associates Degree in a related discipline such as Information Technologies or Engineering.
- 2+ years of work experience as a Test Technician.
- Experience with testing portable battery powered signal processing devices is desirable.
- Basic skills with Vibration Analysis and familiarity with Condition Based Maintenance is desirable.

Due to the nature of our products and services, and the customers we serve, only US Citizens or Lawful Permanent Residents may apply.

Azima DLI is an affirmative action/equal opportunity employer.
