

TRIO™ Carry Options

TRIO™ offers several configurations that allow you work efficiently.

TRIO's **new ergonomic design** includes flexibility in how it is used in the field. Each configuration considers efficiency and comfort. The utility belt keeps your hands free allowing a higher level of safety while climbing and working around dangerous machine locations.

When you purchase your TRIO, a hard case is included along with the standard carrying option shown below. If you prefer having multiple options, additional components are available from Azima DLI.

Utility Belt Configuration

The TRIO utility belt option allows you to carry your complete TRIO system on your belt. This option provides greater safety and convenience while the in the plant. Coupled with the Voice Command Acquisition feature of TRIO system, use becomes largely hands-free. The utility belt is constructed of durable nylon and includes a belt, belt holsters for the TRIO controller, data processing unit, laser tachometer and triaxial sensor and a tool pouch.

The utility belt configuration is the standard carry option for the TRIO CX7 and CA6.

Casual Fit

The casual fit option follows more of the traditional vibration data collector model. The TRIO controller is worn by a comfortable shoulder strap that may be attached to any of its four corners. The data acquisition module and sensor are carried on a convenient and comfortable belt-holster assembly.

The casual fit configuration is the standard carry option for the TRIO CX10, CA10, CX8, and CA8.

TRIO Courier Bag

The shoulder-worn soft pack offers a convenient, all-in-one case with a removable cover flap and external tool pouch. The soft pack includes an internal organizer to keep each TRIO component in its place. The soft pack will contain the TRIO controller, data acquisition unit, laser tachometer and triaxial sensor.

TRIO Hard Case

The hard case is included with each TRIO purchase. It provides superior protection for TRIO components for shipping or storage.

It has removable interior foam allowing the hard case to be repurposed to carry TRIO or other tools and supplies that you take into the field.

TRIO Monolithic Enclosure

As an optional accessory for the TRIO CX10 or CA10, the monolithic enclosure offer more of the traditional design to vibration devices in the field. Integrating the TRIO Controller and TRIO Processor into a single enclosure puts the entire program into the hands of the users in the field.:
